

Small Terex PT30 with automated 3D laser system for tight access and pipelines 1240 wide or 1560 wide

## Giving you grading precision up to 2 to 5ml with precision 3D automatic grading systems

Your project will benefit from our specialised equipment & our team of professionals, as we provide you with the highest precision finish for your site preparation and maintenance needs.

## TrackLinkWA can provide you with 4 levels of 3D automatic grading.

Within the construction and civil works industries 3D automatic grading is considered the most accurate and efficient way to obtain high tolerance grading. And with our unique 3D automated grading system your project will be finished with extreme precision!

## Which system do you need?

Depending on your project and how much tolerance will be accepted, Fintan and the team can advise on which automatic grading system will be best for your project.

- 2D GPS giving you up to 40 ml tolerance
- 3D GPS giving you up to 20 ml tolerance
- 3D TPS giving you up to 10 ml tolerance
- 3D Laser giving you up an amazing 2 to 5 ml tolerance

Large Terex PT80 with 20 GP bucket on GPS (2.2m wide) accuracy 20 to 40ml

Large Terex PT80 with 3D automated GPS grading system (2.2m wide) accuracy 15 to 20ml

Large Terex PT80 with 3D automated TPS grading system (2.2m wide) accuracy 5 to 10ml

Large Terex PT80 with 3D automated laser grading system (2.2m wide) accuracy 2 to 5ml

- Main roads
- Civil works
- Subdivision
- Pipeline
- Sporting surfaces

From our head office in Wangara we service the wider Perth Metro area, we can assist with regional projects and provide a team and equipment to suit your needs. You won't beat the TrackLinkWA grading systems, we will give you a finish grade accurate to within 2 to 5 ml. There is no grading equipment more accurate available in WA!

# Specialised Vegetation Clearing, Firebreak, Slashing & Mulching solutions

Cost effective solutions to  
clear & protect your property

For all your mulching and clearing needs.

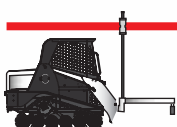

Firebreak      Residential block slashing      Commercial paddock slashing  
Tree & scrub removal      General block clearing & mulching

We specialise in clearing trees, scrub, overgrown sections of land, clearing firebreaks, trails and walkways in areas of bush. Our services and specialised equipment can be used for small and large vegetation clearing projects, domestic or commercial, rural or around suburban housing (space permitting).

## TrackLinkWA can assist you with:

- Creation of a new firebreak to meet your local council guidelines
- Maintain an existing firebreak to make sure it will effectively protect your property from fire damage
- Paddock and block slashing and clearing
- Tree and shrub removal
- Mulching solutions

Contact Fintan to  
discuss your project requirements.
